

DiamondTec

360° Diamond Coated File Scalers

You'd never settle for half an instrument.
That's why we put a full 360 degrees of diamond
coating on Hu-Friedy's new DiamondTec file scalars.

The scaler with complete diamond coverage for
unbeatable scaling access and versatility.
Hu-Friedy's exclusive 360 degree
coverage is ideal for horizontal,
vertical and oblique stroke patterns.
DiamondTec's color Signature Series
grips make instrument identification a snap.

Micro Mini Five Gracey Curette

■ The advantages:

- ▶ ultra slender blades
- ▶ increased shank rigidity
- ▶ Micro Mini Five Gracey Curettes enable to precisely debride root and tooth surfaces free of all deposits - even in the deepest and most challenging periodontal pockets
- ▶ revolutionary EverEdge[®] Technology stays sharper longer for less time sharpening and reduced hand fatigue

everedge[®]
TECHNOLOGY

Sharpen Less Often

Revolutionary new stainless steel alloy is super-durable to stay sharper longer – 50% longer. That means less time sharpening and less hand fatigue.

Proprietary Process

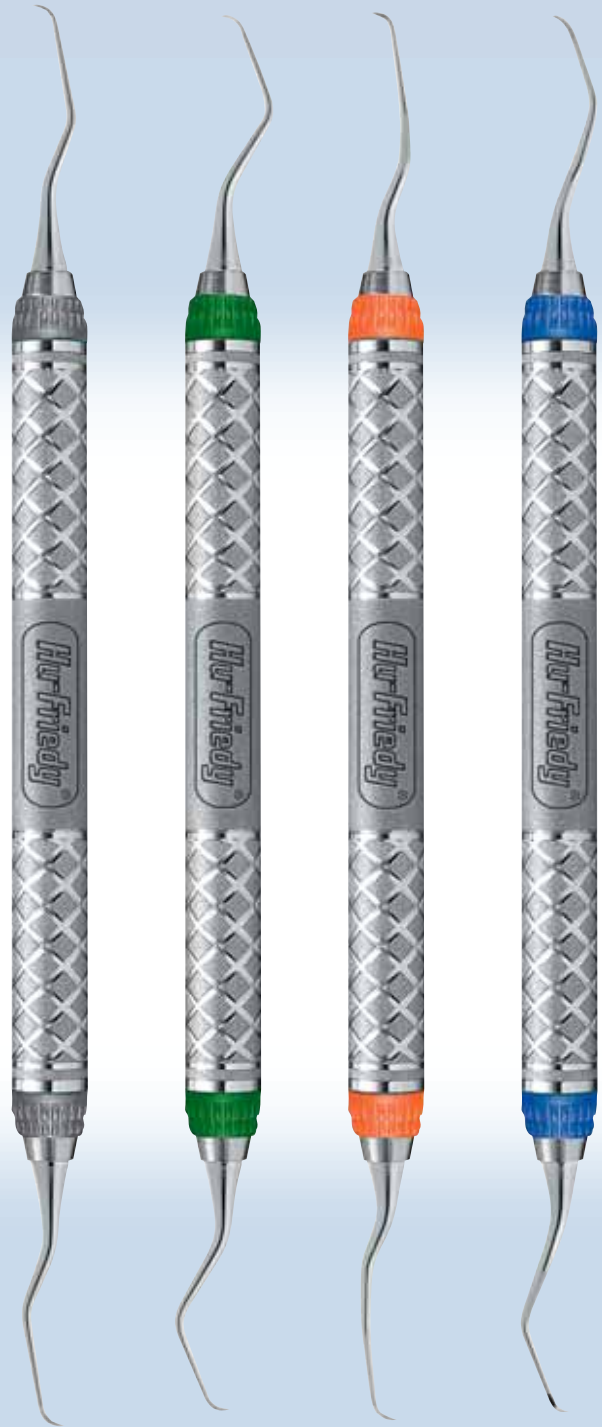

Proprietary heat treat and cryogenic processing ensure that the superior edge retention and wear characteristics of EverEdge[®] Technology will last the entire life of the instrument. It's not a superficial coating – EverEdge[®] Technology scalers can be sharpened again and again for your best instrument value.

Diamond Knurl

Unique diamond knurl pattern with large diameter handle for a confident grasp. Optimal weight for reduced hand fatigue

Finely-Honed Finish

EverEdge[®] Technology Scalers feature a finely-honed finish to the instrument blade, for super sharp edges and efficient scaling.
